Services

Work With Me

I help teams build secure, automated cloud platforms on Azure. Available for freelance, contract, and remote engagements.

AKS Platform Setup

Production-grade AKS clusters with networking, RBAC, monitoring, and workload identity. From zero to running workloads.

Terraform IaC

Full Azure infrastructure as code with modules, remote state, and CI/CD integration. No click-ops.

CI/CD Pipelines

GitHub Actions or Azure Pipelines with OIDC authentication, automated testing, and staged deployments.

Keycloak / Entra ID IAM

Identity platform design and implementation. SSO, MFA, role mapping, and federation between Keycloak and Entra ID.

Spring Boot + OAuth2

Secure Java backends with Spring Security OAuth2/OIDC. Resource server configuration, token validation, role-based access.

Azure Cost & Security Review

Audit your Azure environment for cost optimization, security gaps, and governance improvements. Actionable recommendations.

Engagement Types

Freelance	Contract	Remote
